

Island Expedition

You've washed ashore on a deserted island! Can you find enough materials to survive?

2-12

6+

Smart-
sleeves

Getting started

- ✕ Prepare at least two Smartsleeves in each of the following colors: red, green, yellow, and blue.
- ✕ Red cards represent crabs, green cards represent leaves, yellow cards represent bananas, and blue cards represent water.
- ✕ Distribute the cards randomly across the playing area.

How to Play

- ✕ The goal is to get the most items on your island.
- ✕ First, pick your island by scanning a card. But be quick, each island can only have one player.
- ✕ When everyone has an island, the game starts by itself.
- ✕ Your controller will show you a color. That's the item you need to find.

- ✕ Look for a card with the same color as your controller and scan it.
 - Don't scan your own island card!
- ✕ Take the item to your island by scanning your island card.
- ✕ You get a point when you bring something to your island.
 - Your controller will show you a new color, so you know what to look for next.
- ✕ If you scan the wrong color or try to bring something to the wrong island, your controller will tell you.
 - Keep looking for the right card.

End of the game

- ✕ The player who has the most items and the most points wins the game.

Colors and interaction

 *Purple*
choose an island

 *White*
you have chosen your island

 *Red blinking + incorrect sound*
someone already took that island

 *Red, yellow, green and blue*
this is what you need to find

*Blinking red, yellow, green, and blue + buzz + beep
you found it! Now bring it to your island*

*Fast white blinking + buzz + correct sound
yes! You dropped the right item at your island*

*Fast blinking color + buzz + incorrect sound
oops... You found the wrong item, or you're trying
to take it to the wrong island*

*Purple blinking + beep
you scanned your own island*
