

Camelot

In Camelot, two teams compete to build King Arthur's castle! Which team will be the fastest?

2-32

8+

Smart-
sleeves

Getting Started

- ✕ Put the Camelot cards into the Smartsleeves.
- ✕ The cards are divided into assignment cards and material cards. You can recognize the material cards by the dark blue border.
- ✕ Spread the material cards and assignment cards around the play area.
 - Easier version: Spread half of the assignment cards on one side of the play area, and the other half on the other side. Have each team pick cards from one side. In this case, make sure there are not more players than assignment cards.

How to Play

- ✕ Start the game. The controllers will automatically make 2 teams.
- ✕ Choose an assignment card and scan it. Each card can only be scanned once by your team.

- ✕ Wait until everyone has scanned an assignment card. Then the game begins.
- ✕ Look at your assignment card to see what materials you need to collect.
- ✕ Find a material and scan it.
- ✕ Bring the material back to your assignment card. Scan the card to drop off the material.
- ✕ Keep doing this until you have found and dropped off all your materials.
- ✕ Wait for your whole team to finish their assignment cards.
- ✕ Get together with your whole team.
- ✕ Shake your controller fast to build the castle. Everyone on the team must do this.

End of the game

- ✕ The team that finishes building their castle first, wins the game.

Colors and interactions

Red or blue

your team color. Choose an assignment card

Fast white blinking + buzz

assignment already chosen by another player

Breathing in team color + beep

you have chosen an assignment card. Wait for other players

 *Countdown*
the game is about to start

 *Purple + buzz*
search for material

 *Solid green + buzz + beep*
you scanned a material

 *Fast white blinking + buzz*
you scanned the wrong material or the wrong
assignment card

 *Fast green blinking + 2x buzz*
you dropped off the correct material

 *Breathing in team color*
you have collected all materials. Wait for your
team

 *Solid team color + buzz*
you can build now
