

Three In A Row

Find the sets of three! In Three in a Row, you practice the material by matching three cards and scanning them in the correct order.

1

6+

**Smart-
sleeves**

Getting started

- ✖ Get the ready-made Picoo printed cards that go with this game or make your own printed cards.
 - Make sure that three cards always go together (for example, step 1, step 2, step 3, or pictures that tell a story). The order of the cards is important!
- ✖ There is a number on the back of each printed card. Place the cards in the SmartSleeve with the same number.
- ✖ Scatter the SmartSleeves across the playing area.
- ✖ Start the game. The controller that you use to scan the game card becomes the play maker controller.
- ✖ Scan the next unused SmartSleeve using the play maker controller. If you are using all of the SmartSleeves, press the button on the play maker controller twice.

- **Example 1:** If you are using 9 cards, scan SmartSleeve number 10.
- **Example 2:** If you are using all 24 cards, press the play maker controller button twice.

How to play

- ✖ Object of the game: Find the sets of three cards and scan them with your controller in the correct order.
- ✖ Find and scan the first card from any set. Your controller will turn purple and vibrate briefly. You are now working on this set.
- ✖ Find and scan the second card from the same set.
- ✖ Find and scan the third and final card in the set.
- ✖ Have you scanned the set in the correct order? Great! That set is complete. Now start looking for the first card of a new set.
- ✖ Have you scanned a set in the wrong order, or a card that doesn't belong to the set? Oops! Please try again.

End of the game

- ✖ Have you scanned all the sets correctly? Then the game is over!

Colours and interaction

Getting started:

-  *Blue*
set the number of cards

During the game:

-  *Slow purple blinking*
you are looking for the first card
-  *Purple + buzz + sound*
you have scanned the first or second card.
Find the following card
-  *Rapid green blinking + buzz + sound*
set successfully completed!
-  *Rapid red blinking + buzz + sound*
the wrong card has been scanned
-  *Rapid orange blinking + buzz + sound*
the set has been scanned in the wrong order
-  *Rapid white blinking+ buzz + sound*
a card from a set that was already found has
been scanned
-  *Rapid blue blinking + buzz + sound*
the same card was scanned again

End:

-  *Green blinking light + buzz + sound*
you have found all the sets!
